

## How to Log in to Oracle

Watch the Week 1 Video (Also Under Resources/Oracle Helps) for more info

1. Goto <https://support.it.illinoisstate.edu/kb/connecting-to-vdi/>
  - a. Please note you do not need the VPN client anymore, and you are connecting to vdi.it.ilstu.edu
  - b. Make sure you are logging in with your ULID, not the provided SQL credentials.
2. Connect to the "ITLab-Pool" > and go to start menu and type "SQL" and then click on "SQLDeveloper (also under "Database Tools" folder in start menu)

### SQL Developer Setup

1. Add the connection name
2. Add your **user name** and **password**
3. Enter the **hostname**, **Port** and **SID** exactly as shown
4. Select Test  
You should see **Status: Success**

**NOTE:** You must be on campus **or** connected to the VDI to access the Oracle DB

If you do not see **Status: Success**, *you have entered something incorrectly.* Please review the above steps and enter the information **EXACTLY** as shown
